

Lower Owning and Operating Costs—Maximum Productivity

The 450 Series II sets a new standard in the 45 ft. (13.7 m) articulating boom lift class. The increased work envelope benefits operators on both jib and non-jib models. Plus, the 450 Series II features JLG's exclusive Control ADE™ (Advanced Design Electronics) system which provides enhanced performance and serviceability.

Maximum Productivity

Productivity on the job is vital and the 450 Series II is up to the task with increased rough terrain performance and industry leading duty cycles.

- 45% gradeability on 4x4 models reflects true jobsite performance
- The Control ADE system provides better fuel efficiency to lower costs and increase uptime
- Standard articulating jib on the 450AJ increases access in confined spaces

Designed to keep the machine where it belongs—on the job

The electrical and hydraulic systems have been enhanced to eliminate complexity and reduce service.

- The Control ADE system has minimized the number of wires and connections
- The hydraulic system has been redesigned to eliminate hose wear and minimize maintenance—hoses have been reduced by 250 ft.
- The new tower boom provides elevation that makes the operator feel more at home in the sky

Operator Preferred Controls now with Control ADE

- The Control ADE system links the 450 Series II to other combustion-powered boom lifts, reducing the need for repeated service training
- The control layout provides operation uniform to other JLG boom lifts
- Heavy duty cast aluminum control box is JLG's answer to jobsite abuse
